Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 41, 44, and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by Brammer (US Patent 3,507,515, already of record, see paper #9, dated 11/24/2000).

Brammer shows a foldable step. Flat mounting plate 34 (a mounting portion) is adapted to be secured to the hitch in front of the hitch ball. (The examiner is considering the whole bumper to be the hitch.) Step 20 is hinged to the mounting plate 34 by pin 38 (pivot pin) and is pivotal between the position shown in figure 4 (deployed position, above the hitch ball, usable regardless of trailer, sufficiently close to the hitch) and the position shown in figure 7 (stowed position, forward of the hitch ball). The flat portion of plate 34 (lug portion) is a bearing surface for step 20 in the figure 4 position.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 42-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brammer in view of Criley (US Patent 4,846,487).

Brammer, as applied above, shows all of the limitations of the claims except for specifying a means for locking the step in the deployed position.

Criley teaches, figure 3, a foldable step apparatus, which uses a locking clip or pin 60 to lock the foldable step in a particular position in order to prevent movement or unfolding of the step.

Based on the teaching of Criley, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Brammer foldable step system to use the locking pins of Criley in order to prevent movement or unfolding of the step.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cuff whose telephone number is (571) 272-6778. The examiner can normally be reached on 8:00 to 5:30.
